

**REMARKS/ARGUMENTS**

The foregoing amendments and the remarks that follow are meant to impart precision to the claims, and more particularly point out the invention, rather than to avoid prior art.

Claims 51-77 are pending in the application. Claims 51-77 are subject to a restriction requirement. New claims 78-81 are added.

**Restriction Requirement**

The Examiner has stated that restriction to one of the following inventions is required under 35 USC § 121:

- I. drawn to a method of conductively interconnecting electronic components using a curable adhesive/epoxy composition, classified in class 156, subclass 330.
- II. drawn to a radio frequency communication device, classified in class 340, subclass 572.1.

Applicant respectfully elects invention II. At least claims 65-81 are directed to the elected invention. Claims 51-64 are withdrawn.

Since Applicant elects the product claims, Applicant respectfully requests the consideration of the withdrawn process claims for rejoinder upon the indication of allowable product claims.

**CONCLUSION**

It is respectfully submitted that all of the Examiner's objections have been addressed and that the application is now in order for allowance. Accordingly, reconsideration of the application and allowance thereof is courteously solicited.

Authorization is hereby given to charge our Deposit Account No. 50-2638 for any charges that may be due. Furthermore, if an extension is required, then Applicants hereby request such an extension.

Respectfully submitted,

Date: May 12, 2008

/John P. Ward/
